

Fire Destroys Barn & Granary

The large barn and granary on the Lee Persinger place, 6 miles northeast of town was totally destroyed by fire Sunday last.

The fire, the cause of which could not be learned, started shortly after noon. Four horses were in the barn at the time, two of which Mr. Persinger was able to save and was somewhat burned in doing so.

The loss included two horses, seven sets of harness, a foot grinder and a large quantity of greenfeed and grain.

WEDDING

DEADRICK-CONWAY

A quiet wedding took place at the United Church Parsonage, Oids, on Wednesday, November 5, when Miss Edna Conway of Oids became the bride of Mr. Eldon Deadrick of Didsbury, the Reverend F. E. H. James officiating. They were attended by Mr. and Mrs. Orvil Zinn, the latter a sister of the bride.

After the ceremony the happy couple left by motor for points south, and upon their return will reside at the groom's home north of Didsbury.

Are You a Slave to Aching Feet?

Permits Issued

Remembrance Day Services.

At Knox United Church, Sunday November 11th.

The Annual Remembrance Day services will be held on Sunday, Nov. 11th.

At 11 a.m. the members of the Canadian Legion will meet at the Butte when the president, Mr. J. Robertson will place a wreath on the Memorial in honor of their comrades who fell in the Great War.

At 7:15 p.m. the members of the Legion will meet at the Oddfellows' Hall and will parade to Knox United Church where Remembrance Day service will be held. The service will be in charge of Mr. H. W. Chambers and Rev. A. D. Currie, rector of St. Cyprian's Anglican Church. Mr. Geo. Clark, of Eagle Hill, will give the address.

PROGRAMME.

Voluntary	Mr. R. Webster
Hymn	"Lord of the Lands"
Prayer and Lord's Prayer	Rev. A. D. Currie
Hymn	"O God our help in ages past"
Scripture	Psalm 46: Rev. 7: 9-17
	Offertory
Anthem	"What are these?" Westcott Choir
Last Post	Dr. H. C. Liesemer
	Two Minutes Silence
Reveille	Dr. H. C. Liesemer
Memorial Prayer	Rev. A. D. Currie
Commemoration Hymn	Westcott Choir
Hymn	"Shall we gather at the river"
Address	Mr. George Clark
Hymn	"Abide with me"
Benediction	National Anthem
	Mr. H. W. Chambers, Chairman

Board of Trade Meeting at Community Hall.

The meeting of the Board of Trade which was held at Community Hall on Tuesday night met with a good reception and there was a good interested audience.

Mr. George Burns occupied the chair, and Mr. John E. Gooder, president of the board of trade, spoke briefly and outlined the objects of the board of trade, which he pointed out was to bring the farmers and townspeople in closer touch with each other so they could work together for the benefit of the whole community.

Mr. E. W. Brunsden, secretary of the provincial livestock marketing commission, was the guest speaker, and gave an outline of the "Marketing Act." He stated that the object of the marketing boards which they were trying to establish under the act was to try and stabilize the prices of the different farm products. He said there was considerable unfair opposition to the establishment of the marketing boards and urged the farmers to make themselves familiar with the objects of marketing boards, which were for the benefit of the producers. He also stated that before any marketing board was established the producer would have an opportunity of voting on the subject.

Several numbers were given by the Kirk-Burns Orchestra and much enjoyed, and a song was rendered by Mr. Kirk.

Mr. J. A. McGhee spoke to a vote of thanks to the speakers and to Messrs. Burns and Ed. Liesemer for arranging the meeting. He also thanked the ladies for the splendid lunch they provided.

Several numbers were given by the Kirk-Burns Orchestra and much enjoyed, and a song was rendered by Mr. Kirk.

Mr. J. A. McGhee spoke to a vote of thanks to the speakers and to Messrs. Burns and Ed. Liesemer for arranging the meeting. He also thanked the ladies for the splendid lunch they provided.

Several numbers were given by the Kirk-Burns Orchestra and much enjoyed, and a song was rendered by Mr. Kirk.

Several numbers were given by the Kirk-Burns Orchestra and much enjoyed, and a song was rendered by Mr. Kirk.

NOTICE.

The Local Elevator Men wish to announce that

AFTER WEDNESDAY, Nov. 7 all local elevators will be closed every Wednesday afternoon at 1 o'clock.

Also on other holidays as taken by the local business houses.

Town Council.

The regular meeting of the town council was held Monday evening, with Mayor Chambers in the chair. Counsellors Spence, Gooder, Reiber, Pitt, Fleury and Budgion were present.

Dr. Clarke and Mr. W. G. Liesemer appeared before the council on behalf of the Board of Trade and asked that a rest room for convenience of the country people and visitors to the town be established. Dr. Clarke reported that the Stevens Service Garage were willing to open their rest room to the public, provided that the council were willing to undertake the place being kept in order. A committee was appointed to make arrangements with Mr. Stevens.

A representative of the Frye-Flyer Company appeared before the council and gave an estimate of the cost of additional fire-fighting equipment and an estimate from the American-LaFrance Company was also presented. It was decided to hold a special meeting Monday evening next to consider the matter.

The question of arrears of business tax for 1933 was discussed and it was decided to give those in arrears until December 15th to make payment, after which proceedings would be taken for collection.

Reverend A. Traub, president of the Mountain View Bible School, appeared before the council and asked that a rebate be granted on the taxes of the Bible School. It was decided that as the property in question was used exclusively for educational purposes a rebate of 50% be granted as in former years.

The road leading east of town was reported to be in bad condition and the public works committee were instructed to make arrangements with Mountain View Municipality, who had agreed to assume 50% of the cost and have a coat of gravel put on the road.

Mr. and Mrs. A. O. Fisher and Mr. and Mrs. W. J. McCoy were guests at the Corona Hotel in Edmonton over weekend.

Curling Club's 25th Birthday.

Twenty-five years ago today, November 8, the Didsbury Curling Club was organized, with Mr. W. G. Liesemer, president; G. M. Gaddes, vice-president; H. E. Osmond, secretary, and Mr. Cunningham, treasurer. The fee was set at \$5.00.

According to the "Pioneer" of that date they did not have a rink, but Mr. J. R. Good had commenced the erection of an open-air skating rink, with curling sheets to be placed on each side, which were to be covered in, while the whole was to be lighted with several large gasoline lights.

On December 13 the skips were appointed, among whom were W. G. Liesemer and A. G. Studer, and we notice that at the time of election it was provided that the skips could be changed if thought advisable.

Messrs. J. V. Berscht, H. M. Reiber and Norman Clarke, who are still going strong, were among the first members.

Returns from North Country.

Mr. Frank Moyle returned home last weekend after spending the summer on Great Slave Lake and the Mackenzie River.

Frank left here in July to join a party headed for Great Bear Lake, but on arriving at Fort Smith he signed on with a boat plying between Fort Smith and Fort Norman. They made two trips down the river and arrived back at Fort Smith just before navigation closed. He has an interesting story to relate of the objects to be seen and the hazards of operating a freight boat on the lake and that great river running into the arctic circle.

On Jury Duty.

Messrs. Pitt, Aleshead, McCoy and Hillyard went to Calgary on Monday, having been called for jury duty at the Supreme Court. After reporting they were excused until Wednesday morning.

Review Of Drought Conditions Affords Appreciable Picture Of Situation In Various Countries

A review of the drought conditions of 1934, issued under date of August 15, 1934, by the Bureau of Agricultural Economics, United States Department of Agriculture, Washington, D.C., affords an appreciable picture of the situation in various countries, particularly in the United States, arising from the unusual scarcity of rainfall which has characterized the summer of this year.

The drought has been widespread throughout the northern hemisphere. The affected areas fall within a belt crossing Europe, Asia and North America which is about as wide as the distance from Northern Mexico to Central Mexico. Damage to crops has been particularly heavy in the United States, Canada and in Central and Eastern Europe. In the southern hemisphere, parts of Australia and Argentina have been affected but to a less extent.

In the United States the main drought damage is in the shortage of feed, forage and pasture, necessitating heavy reduction in livestock numbers and reduced returns for the remaining animals. Crop prospects declined nearly 11 per cent during May because of unfavorable growing conditions practically everywhere except along the Atlantic Coast, in the Eastern cotton belt and in the Pacific Northwest. The most serious loss was a decline of about 21 per cent, or 60,000,000 bushels, in corn prospects during this period. In the West, reduction of corn fodder was seriously reduced. The grain sorghum production will be less than 60 per cent, of average. The continued drought and excessive temperature, prevailing over a wide area, largely destroyed the emergency forage crops planted, burned pastures, prevented any second growth on hay meadows and stable fields in many states and further reduced supplies of water for livestock. The worst conditions embrace much of Missouri, Kansas, nearly all of the Dakotas, Nebraska, Kansas, and Oklahoma, much of Texas and the plains sections of New Mexico, Colorado and Wyoming. There was a further deterioration of range conditions during July in most of the Western States for which range conditions figures are obtained.

Judging from conditions as at August 15th, there will be available for livestock in the United States this year only about 60 per cent of the usual amount of grain including corn, oats, barley and grain sorghums, and only about 48 per cent of the usual quantity of hay. Because of the short pastures a considerable amount of the 1934 production of hay had already been consumed by August 15th. Probably not more than half the usual amount of straw has been stocked, but somewhat more than the usual quantity may be fed. For these reasons a rather drastic adjustment in the number of livestock will have to be made before fall and winter feeding begins.

Broad grain crops in Central Europe and the Danubian countries are substantially below the crops of 1932 and 1933. The same is true of feed grains with the exception of corn in the Danube basin, where a substantial exportable surplus is expected. Excepting North in France, where wheat suffered from drought, and England, where pastures were seriously affected most of the other parts of Europe have escaped serious drought. Detailed reports on crop conditions in the Soviet Union are not available but it appears that European Russian experienced an unusually dry spring and smaller than average crops are to be expected. In China the reduction in the rice crop because of drought is estimated to be at least 20 per cent. The Manchurian wheat crop is estimated at 20 per cent below that of 1933 due mainly to excessive rainfall and floods during July. Several parts of the southern hemisphere have reported drought conditions in the recent months affecting wheat seedling in areas of Argentina and Australia. The average reduction in Argentina due to drought may reach 35,000,000 acres or about 5 per cent, while in Australia the average reduction in production of 2,000,000 acres or more (around 15 to 20 per cent) is in prospect. The average reduction in Australia is not altogether due to drought, but in part to a shift to sheep and wool.

The following information from Canadian official sources and indicate the effect of the drought as experienced in Canada.

The Dominion Bureau of Statistics in a bulletin issued September 11, estimates the total yield in bushels as follows: Spring wheat, 27,282,000 bushels; Fall wheat, 7,022,000 bushels; 34,304,000; Barley, 68,800,000 bushels; 103,106,000; Flaxseed, 10,000,000 bushels per acre of all groups are below average but are slightly higher than the revised estimates for last year.

The hay and clover crop is estimated at 8,850,000 tons, the lowest on record as compared with 11,423,000 tons in 1933 and almost average position of more than 10,000,000 tons for the four years 1928-1931. The fear was therefore well founded that Canada might be faced with a hay shortage, and the Order-in-Council of August 24th was accordingly passed requiring a license for all exports of hay and straw. A subsequent survey of hay supplies indicated some surplus in the Ottawa and St. Lawrence Valleys and to a less extent in a few other areas of Canada, but a shortage in other areas which in many instances is acute.

The Order-in-Council has had the effect of shifting attention to the unusual shortage of supply, and the resulting of a license for export has prompted those in newly groups to anticipate their season's requirements with the result that there is now a substantial movement of hay to Canada from the surplus areas to the areas of shortage.

Keen Rivalry

French Liner Normandie Claimed To Be Larger Than Commander

Keen rivalry between the giant French liner Normandie, which will go into service next spring, and Queen Mary launched at Clydebank, Scotland, already is apparent. Command-White Star Line claims that the Queen Mary is the largest ship in the world's fleet, but the Normandie, which is under construction, is claimed to be larger than the Queen Mary.

The Normandie already has cost far more than the estimated \$30,000,000. It is 1,029 feet long, while the Queen Mary is 1,018. Much of the outgoings centres on which ship has the greater damage. The cost figures still are unavailable, but the French press gives the Normandie between 70,000 and 75,000 tons with the half-skip given 72,000 tons. Wide publication was given to many articles comparing the ships.

Plant Disease Survey

Experiments Carried Out Result In Decreased Loss From Smut

The Dominion Bureau of Plant Disease Survey carried out by the plant pathologist of the division of botany, Dominion experimental farms, showed that during 1933 damage due to wheat smut in the Red River valley, usually a territory exposed to severe damage, was less than two per cent. Smut, so often the cause of lowering the grade of wheat, was the cause of only 0.4 per cent of wheat being graded "smutty," as compared with 2.8 per cent for the corresponding period of 1930, one of the worst years. This is undoubtedly due to the campaign for the control of this disease by seed treatment, especially in durum wheats. These varieties graded 1.2 per cent smutty in 1932, whereas in 1930 the percentage of ears graded smutty was 16.8.

Scientists Discover New Method Of Growing Crops Which May Revolutionize Agriculture

HANDWRITING REVEALS CHARACTER

By LAWRENCE HIBBERT (Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: Considerable interest has been aroused in these articles, written by a well-known handwriting expert. Have you your handwriting analyzed? See the announcement at the foot of the article.)

A young lady from a small town in Saskatchewan sends me a letter, enclosing a photograph of the handwriting of her own heart. Part of her letter follows: "In sending you my own handwriting, and also that which I have always thought I respected my affection. But I am beginning to wonder if he really does not whether he is the right type of man for me. I love him very much, but would rather finish things with him now, than have a lot of trouble and unhappiness later on. We are engaged to be married, but he is not making a date for the wedding. And I have been told that he goes out with other girls. He seems to me to be a very good man, but I am not sure. Please advise me, and tell me the truth, whether it is good or bad."

I am sorry for my correspondent, but am inclined to believe that she is sensible enough to realize, as she says in her letter, that it is better to effect a cure now, than make a great deal more trouble and unhappiness for herself later on.

Her own handwriting shows a warm, ardent nature that simply cannot have the affection of others. She is honest and trustworthy, and has a good deal of natural pride. Her letter shows that she would like to own a home of her own, and that family life would be her métier.

On the other hand, the writing of her friend is not so good. It shows unreliability and a predilection for deceit. He is of a cold type, but a very intelligent and naturally affectionate in the kindly sense. He is of a rather "physical" type.

My advice to the young lady is that the young man is not the one best suited for her. If she marries him, he will deceive her just as he is deceiving her now, because it is his nature to do so.

And there is a streak of dishonesty in him. This coupled with the very delicate indications of deceit, tells me that she will only get unhappy if she continues to go with him.

And, speaking of the practical side, she is a very good writer. She is losing her opportunities of making the acquaintance of a man who may be a good friend of hers, and make her a good husband.

Do you want your handwriting analysed? Do you wish to know the character that is shown in it? If you are in the line, it is with a person suited to you? These and other revelations will be made from handwriting. Send a letter in your normal handwriting, and state briefly in every case, and enclose with the coin and 3 stamp-d addressed envelopes. If you enclose more than one specimen to be analysed, please enclose coin for each. Replies will be mailed as soon as possible, but please allow at least two weeks for reply. Address: Lawrence Hibbert, Grapho-Analyst, care of Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Had To Have Proof

A New York East Side post-maker, who has become quite a figure in the movie-producing world, was recently selecting a chief for his scenario staff. The producer insisted that the successful applicant must be a college graduate, be looked with favor upon the applicant, and asked if he had a college education. He received an affirmative reply.

"Show your diplomas," demanded the producer. The applicant tried to explain that it was not customary for college graduates to carry diplomas around with them.

"Well, then," demanded the producer, with just a slight sneer, "may me a big word."

In Swedish post bags have been found a wooden clasp from B.C., and a wooden clasp still more ancient.

On the Suffolk, England, farm of Michael Farraday, grandson of the great electrician and inventor, Thomas Edison, the first practical results of a sixteen years' research into a new method of growing crops which may entirely revolutionize agriculture.

Here, by a special process discovered in Germany by Dr. Paul Sprengel, the most fertile crops of maize and barley are grown in 10 days, not in the ground, but in chemically treated trays arranged in tiers inside metal cabinets. These crops are brought out daily to feed cattle and pigs, or like ferns and the animals are brought to the most fertile others, and with ordinary outdoor fodder.

Farmers at the recent Ipswich Agricultural Show were amazed at this new invention. Already a company has been formed to manufacture the equipment and supply the necessary chemical elements. The name of the company is British Cultivators, Ltd., and the process has been fully patented under the name of "Kwick Grow."

Dr. Sprengel made his discovery by analyzing the most fertile soil he could find and duplicating its nutrient content in a chemical solution. This solution is fed to the seed. Only small quantities of water are required and no earth is used. The seed germinated by this process are sold to produce five times the volume of seed planted in the ground.

Each cabinet in which the seeds are placed is divided into 10 sections, one for each day's growth, and each section contains eight trays. As each day's crop is "harvested," more seed is immediately put into the trays to produce another crop in 10 days. Thus, the farmer has a fresh crop, approximating the finest June pasturage, every day in the year.

Orders are being received for cabinets from farms in all parts of England, including one farmer who is a tenant of the King at Sandringham. In Germany the government has ordered them in large quantities to be used in concentration camps.

With the growing of crops for feeding animals successfully achieved, investigators are now experimenting on the best growing vegetables. This process is still in the experimental stage, but the men working at it have in mind the ultimate production of smaller cabinets which could be kept in homes in the kitchen, like an ice-box, to supply the family with fresh green produce all the year round. The growing of fresh vegetables is expected to require some years more time than feeding cows.

P. H. Holmner, a naturalized American, who is a director of the company, has been in communication with the American Embassy in London and authorities in the United States, and is now in the process of the process as a means of alleviating the fodder crisis caused by the drought.

Drought-Resistant Grasses

U.S. Delegation Hopes To Find Some In Gobi Desert

Drought and the probability of drought look so large in the minds of the United States Department of Agriculture that they are sending men to central Asia to make a search for drought-resistant grasses.

In the Gobi desert is a vast area of pasture land where the summer temperature frequently rises above 100 degrees and where winter temperatures often drop under 40 degrees below zero. This area has a rainfall of less than 16 inches annually, thus resembling the great plains states area with respect to rainfall and temperature.

It is hoped that some drought-resistant grasses will be found that can be utilized to advantage in the drier sections of this country. Prof. Nicholas Holmner has been selected to head this expedition into Asia.

It is estimated that nearly one person in three in the United States over 40 years of age is suffering from some chronic disease.

The SNAPSHOT GUILD

INSIDE THE HOUSE

Light from this livingroom shot came from broad window at right. The day was almost dull but the camera got every detail in an exposure of only a few seconds. Stairways almost always have light picture possibilities. The stairs shown here have an unusual twist, which was capitalized by the snapshotter. But even the best give you striking and memorable pictures. All you need is a watchful eye and a handy camera.

If you're out taking pictures of the inside of your home because of a vague notion that such pictures are difficult, here's the reason why. Get out your camera. Here are a few pointers that may help you in your first shots.

In the first place, you will need to make time exposures. And for successful time exposures the camera must be absolutely steady. Use a tripod. If you have one, or mount the camera on some substantial support such as a table, too, the camera must be level, otherwise corners and doors and windows will not be properly straight up and down.

It is a good idea to place your camera so that you get only a little of the ceiling in the viewfinder. There's more of interest nearer the floor.

The secret of success in indoor pictures lies in controlling the light reaching the various parts of the room to be pictured. To begin with, never point your camera directly at the window or door through which the greatest amount of light is coming. Keep the light behind or to the side of the camera. If, as sometimes happens, a sunny window is in a particular part of the house you want to take your own window-sunlight by a very simple trick. Pull the shade of that particular window clear down and keep it down for an exposure or two. Then, when you have the features and details. Then, close the shutter and run the shade up to its normal position. Now, go back to the camera and, without changing the film or the camera's position, get the shutter ready for a half second longer.

It's a good idea to use a very small lens cap in taking indoor pictures, because you want detail in everything. Focus on a point about halfway between the camera and the far side of the room, then, when the lens is stopped down you will find that practically everything is in sharp focus.

Avoid including large pieces of furniture in the foreground, lest they take up more space in the picture than they deserve.

Watch out for distracting reflections in mirrors or glass covered pictures. By putting a small wall of paper under one corner of a picture, there is room can be taken with the glass, you can usually get rid of a reflection.

Exposure time will vary, of course, with the brilliancy of the daylight and the degree to which the walls reflect light. On a bright day, pictures in a predominantly light room can be taken with an exposure of five or ten seconds. On dull days, in dark rooms having only one window, you will need as much as five minutes, with the lens at f16.

If you've never tried interiors, you'll find them plenty of fun and the results will surprise you with their excellence.

Poppy Day.

The symbolism of the Poppy, the sorrowful appropriateness of its blood-red bloom, takes a deeper significance with each succeeding year. The Great War is passing almost into a legend; a generation is bequeathed the duty of carrying into the years that have yet to come the work and the ideals of those whom the Poppy commemorates.

Canada has adopted the Poppy as a symbol because of the 60,000 graves in France and Belgium in which lie the dead of the preceding generation; because of the 170,000 Canadians to whom the conflict brought disablement of one kind or another. The crosses in the cemeteries of Flanders are garlanded with Poppies—dolorous emblems of a nation's youth consumed in the "Wrathful Forge of War."

On Poppy Day this Dominion pauses in its normal activities to recall the sacrifice of its young men, to pay tribute to their heroism, their hardihood and the uncomplaining fortitude with which they bore their privations and sufferings. At the same time, Canada strives to liquidate, in some small measure, an obligation to those disabled men employed in the Vetscraft Workshops of the Country, whose only means of livelihood is the making of these simple emblems.

The wide ramifications of the great Canadian Legion, with its tens of thousands of workers on Poppy Day, take care of the distribution of these Poppies throughout Canada. There is thus ensured to their disabled comrades in these Vetscraft Shops a loyal performance of a sorrowful yet praiseworthy task.

All Canadians, of every age and degree, should wear a symbol on Poppy Day. For that is surely a day of reconstruction and of rededication to the work on hand—that of continuing the structure of civilization where the workers of a previous generation left off.

See Your Enumerator.

Every Elector should check-up and see that their name appears on the Voters' Lists which have been prepared by the Red Deer Federal Riding. Your last chance to register will be when the enumerators sit for revision on November 13, 14 and 15. If you are not on the list after that date you will be unable to vote at the next Dominion Election.

The Lists are Posted in the Vicinity of the Residence or Office of the Enumerators. Following are enumerators for this district:

"1914 - 1918"

Here's health and happiness to all who have fought for us; Our undying gratitude to all who have bled for us, And our everlasting reverence for all who have died for us—May we never forget them.
—Contributed November, 1934

Glimpses of the Past

25 Years Ago: 1909
The town fire brigade arranged to bring two shows to Didsbury, the Swiss Bell Ringers on November 12, and the "Bostonians."

Miss Winnie Moyle gave a birthday party to her little friends.

Mr. C. Heibert has sold his elevator to the Imperial Elevator Co.

The school report showed an average attendance of 169.28.

20 Years Ago: 1914
A hundred pairs of socks were sent to Calgary "for Tommy at the front."

An informal meeting was held at the office of J. E. Stauffer, M. L. A. for the purpose of organizing a Patriotic Fund branch.

Complaints are being made that the schoolchildren's horses are not being properly cared for, and the schoolboard are asked to do something about it.

10 Years Ago: 1924
Didsbury lost one of her best and finest old citizens in the passing of Mr. W. F. Sick, at the age of 76 years. Mr. Sick was a town councillor for a number of years.

Mr. Charles Hildebrandt left Didsbury to take over the hotel at Olds.

Auction sale for the farm effects of Mr. P. R. Goehoe.

Community Hall School Fair

Rosebud School was the winner of both the diplomas at the school fair held at Community Hall this fall.

William Hooper, with 67 points, was the highest boy and winner of the short course at the Olds School of Agriculture, with Glen Roberts, 44 points, 2nd, and Stanley Mosley, 26 points, 3rd.

Phyllis McNeil, with 230 points, was the girl winner of the short course at Olds, with Jean McNeil, 204 points, 2nd, and Marjorie Barnes, 175 points, 3rd.

Sermon by Bishop Praetorius

A cordial welcome is extended to all to worship with us.
Those coming from out of town who desire to spend the day
should bring their lunch. Coffee will be served by the ladies
of the church.

New Election Act.

The public is warned that the new
Election Act puts the responsibility
for seeing that his name is on the list
up to the individual. The enumerat-
ors make every reasonable effort to
prepare a complete list, but once
that list is closed there is no chance
of securing-in voters on election day.
In the town and countryside the
preliminary lists will be posted at
some central point accessible to all
interested. On November 13, 14 and
15 the enumerators will sit for the
purpose of revising the list. The
place of sitting will be specified on
the posters, and in rural areas is
usually the home or place of business.
At this date any protests or state-
ments will be heard, and names ad-
ded that are shown to be eligible.
Any necessary revision will be made.
After that date, November 15, the
voters' list is definitely completed
and closed, and any names lacking
from the list cannot be added. This
stands as a permanent voters' list.
In the spring of each year the
voters' lists will be revised. Those
attaining their majority during the
year, changing residence, etc., will
be enabled to have their names
placed on the list.

Westcott Notes.

A very enjoyable evening was
spent at the home of Mr. and Mrs.
Ed. Klink on Tuesday, October 30,
the occasion being Ed's birthday.
Three tables of whist were played,
with prizewinners being Mrs. Jack
Robertson and Mr. Earl Klink, the
congratulations going to Miss Bosie
Hitchworth and Mr. C. Witschusen.
After lunch, Mr. Alice Robertson
rendered a vocal solo, and Mr. Jack
Robertson gave a humorous recita-
tion.

Mountain View Notes

The October meeting of the W.I.
was held in Community Hall, with
Mrs. J. Hill presiding. The meeting
opened by the singing of O Canada,
followed by the repetition of the
Creed, roll-call and reading of the
minutes. The layette sent to a needy
mother in a dried-out area was
greatly appreciated, and another one
has been commenced. Mrs. Bennie
St. Clair read a paper entitled "Trial
By Jury," this having been prepared
by Miss Alice Pearson. Hostesses
for the afternoon were Mesdames
Eric and Helen St. Clair. The
draw was won by the latter. Place
of next meeting: the B. A. Atkinson
home.

Mr. R. Burns of Calgary is a visit-
or with his brother Mr. George
Burns.

Missing Man Found Early This Morning

Mr. David Pearson who had been
missing during Wednesday was
found on the Eubank place northeast
of town early this (Thursday) morn-
ing.

The old gentleman left his home
on foot at about 3:30 p.m. Wednes-
day and at dark had not been located.
A search party was organized and a
large number of men and boys in cars
and about searched all night, but he
was not found until daylight.

Mrs. Pearson, Mrs. Pratt and the
rest of the family wish to sincerely
thank all those who took part in
the search.

Doings Of Our Neighbors.

At Carstairs: Mr. J. Morgan,
who was formerly in the local bakery,
has again taken over the business
from Mr. Thomas.

George Foster, Al. Dorasch and
R. L. Mills were elected directors at
the curlers meeting held last Mon-
day. Motions were passed requiring
curling fees to be paid in advance,
and that non rock owners be assessed
\$1.00 extra.

At Olds: The Olds United Church
celebrated its 34th anniversary this
week.

The Olds School of Agriculture
held its 21st birthday celebration
on November 13 and 14.

At Crossfield: Village Cup has
punch—A number of women were
out hallow'ing Wednesday night.
They kept strictly within the law,
although when three of them ap-
proached Constable Belslaw, and
being dressed in men's attire, he
evidently thought he was to be taken
for a ride, and as one of them grab-
bed his arm he struck out with the
other, and down went one of the
fair maidens, although not for the
count. The lady suffered the loss
of a molar and a cut lip.

Alberta Girl Dies in Paris.

Miss Isabelle Charlotte Mackenzie-
Grieve of Inverfail, Alberta, died in
a Paris hospital, it was learned last
Thursday. She was a sister of Mr.
Mackenzie-Grieve of the Royal Bank
staff here.

Miss Mackenzie-Grieve was 26
years old. She died after having
been found critically ill at a boarding
house for young women.

WORLD HAPPENINGS
BRIEFLY TOLD

Dominion T. Robichaud, Ottawa has been appointed superintendent of the Dominion government's bureau of translation. His salary will range from \$1,800 to \$2,400.

British producers are rapidly casting American goods from the Canadian market, said Howard G. Ferguson, Canadian high commissioner to Great Britain.

Tourists will be worth \$30,000,000 to \$50,000,000 more to Canada this year than last, as a result of efforts to increase the traffic, according to D. Lee J. Hays, director of the C.N.R. former federal tourist bureau.

One of the wealthiest men in Poland, Count Jacob Potocki, died recently leaving his entire fortune, amounting to about \$20,000,000, to a medical institution for the treatment of cancer and tuberculosis to be founded in his name.

Aside from becoming a prominent grain port, Churchill boasted another distinction, it has become the jumping-off place for supplies to the northern missions. This season more than 100 tons of mission supplies were shipped out of Churchill.

Giving impetus to fattening of market cattle in central and northern Alberta, a portion fund of \$75,000 for the three prairie provinces to assist farmers in buying stock has been made available by the Dominion Agricultural Credit Company, Ltd.

All lands owned by the University of Manitoba are exempt from taxation in Winnipeg. Chief Justice D. A. Macdonald ruled, granting an application of the university for an injunction restraining the city from assessing or levying taxes, or selling university lands.

Is Reaching Danger Point

Many persons seem to think that the spending possibilities of the Government are limitless, but they lose sight of the fact that every dollar appropriated for public purposes has to come from the taxpayer. What the taxpayer fears is that there is a danger line in taxation which is reached when the levies become so oppressive that they cannot be collected. Philadelphia Inquirer.

Recently the following testimonial was received by a patent medicine concern: "For nine years I was totally deaf and after using your ear cure for only ten days I heard from my brother in Nebraska."

ASK YOUR DOCTOR
FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinking mothers take the advice of unqualified persons instead of their doctors—in remedies for their children.

If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequent "coughs of unknown" children, for over 30 years, have said "PHILLIPS' Milk of Magnesia"—the safe remedy for your child.

Remember Me—And Many Say "Phillips' Milk of Magnesia" is the only thing that will give your child relief. It's for your own peace of mind, so that you can get your "Little Phillips' Milk of Magnesia."

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on the market. They are a safe and effective way to give your child relief from constipation, indigestion, and other ailments.

Radio Instruction

The Saskatchewan Government Correspondence School—Radio Broadcasting 1934-1935

The programme of Radio Instruction given by the Saskatchewan Government Correspondence School during the past three years will be continued for the present school year. From Monday, October 15th, to Friday, December 14th, 1934 and from January 14th, to April 20th, 1935, a broadcast will be given daily, except Saturdays and Sundays, from four thirty to five P.M. Mountain Standard Time.

The radio broadcasts will originate at CHRM Regina and the network will include the following stations: CPQC Saskatoon, CHAB Moose Jaw, CIGN Yorkton, CHWC Regina, CKDI Prince Albert.

The instructors will deal with the difficulties of pupils and will answer not only questions in the assignments, but also questions that are daily reaching the School from teachers and pupils. In order to have a fuller appreciation of the addresses, pupils are requested to have their Correspondence Lessons before them.

The following is the programme to be followed:

Little Journeys In Science

DIAMONDS

(By Gordon H. Guest, M.A.)

Diamonds are the purest form of carbon, an element which occurs in almost every living substance. Found in the sand and gravel of rivers, lakes, or sea beds, the stones are separated out by a washing process which carries away the other coatings, leaving the diamond free. These gems have a crystalline form, but sometimes the stones are cut by jewelers to further enhance their brilliance. Clear diamonds have the greatest value, although there are rare occurrences of delicately colored stones which are much prized. Black diamonds are more plentiful than the clear stones and are used for cutting and drilling. Diamonds are also used by engineers in making cuttings.

It has been the dream of many scientists to make synthetic diamonds, and this has been accomplished, but unfortunately, although it is found that the process does not produce sufficient stones to make it worth while.

Mousson, a French chemist, in 1895 was successful in producing a small quantity of the gems by heating charcoal with iron to a very high temperature in an electric furnace. The mixture was then cooled very quickly. A coating of iron was rapidly formed on the outside, but at the centre the coating was slower, and a very small clear and black diamonds were found. Others and others

have also been made synthetically, but not with great success. Diamonds are measured by carats, a unit of weight which is equivalent to three grains (by weight). The largest diamond ever found was the "Cullinan" which was mined in South Africa. This stone originally weighed 3,106.75 carats, but it was later cut into smaller stones.

Even Sell Meat

Dying stages go almost everything but, down in Florida, they have gone far beyond the variety of the stores up this way. A United States cruiser stopped at St. Petersburg and needed 15,000 pounds of fresh meat. The purchase was made at a St. Petersburg drug store.

Java holds the world's record for having the most thunderstorms.

West Indian hurricanes usually travel in a curved path.

Birds can see 100 times better than man.

Carry Out Strange Bequest

Tomb in England Opened Every Year Since 1794

Following an annual practice of 140 years, a family tomb has again been reopened in the Surrey town of Sutton. Exactly 141 years ago Mrs. Mary Gibson, whose parents were buried in a vault, made certain bequests to the rector and churchwardens of Sutton parish church on condition that the Gibson family vault should be opened and inspected every 100 years in August.

This year the assistant priest, Dr. T. W. Croft, entered the vault, inspected the four coffins, and offered up a short prayer. Then the vault which was made in 1777, was sealed up for another year. In Mrs. Gibson's will there is an instruction that when the last member of the family is buried in the tomb the keys shall be thrown into the River Jordan.

At the time of Mrs. Gibson's death, her family were active, and it is generally thought that the reason for the yearly inspection is to make sure that the vault has not been tampered with. A legend which has long been associated with the tomb states that it is opened each year in order that a test which had made its home there might be felt, but there is no evidence to be found in support of this.

Military Nation

Premier Mussolini To Take Charge Of Military Training In Italy

Premier Benito Mussolini gave proof of the seriousness of his intention to make Italy a militaristic nation by taking charge of activities to that end, and creating a new government department to supervise the work.

The new department will be known as the Inspectorate of "Pace and War" military training, and will be charged with the responsibility of making soldiers of all male Italians between the ages of eight and 25.

The Inspectorate will serve as a coordinating link between the army, navy and air ministries, all headed by Benito personally, and the ministry of education and Fascist military bodies.

Voice Warns Drivers

If you are driving in St. Louis, Missouri, and you suddenly hear, coming as if from nowhere, a stern-toned admonition about the way you are handling your car, don't be alarmed. It's merely something new in police police work. For the "traffic school car," equipped with loud-speaker and manned by vigilant officers, has made its appearance on St. Louis streets.

Plenty Of Color

If it's a color you want, says the Edmonton Journal, a new "dictionary" just published by the Truthful Color Council, ought to fill the bill. With 226 shades given in color and supplied each with a name, it should not be possible to "match" a stock or a bit of wood for your wife or even to give an exact description of the most variegated of mammals.

Acquires Television Device

United States Buys American Rights From Austrian Inventor

Gustav Boehm, Austrian inventor, who claims to have perfected a cheap television set, has sold the American rights to his patent.

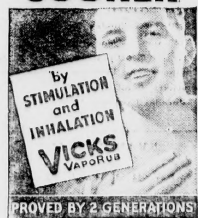

The patent, it is claimed, can be adjusted to the ordinary radio receiving set.

The new apparatus is a short wave receiving set capable of clear television within a radius of 50 miles and receiving pictures 1½ by six feet in size.

Herr Boehm, who has been working in Vienna for ten years on his invention, left for New York to supervise the manufacture of his television set. Details of its construction are kept secret until the apparatus has been placed on the market.

Baked elephant's foot is one of the greatest food delicacies of the African bushman.

Sixty per cent. of Japan's 1934 revenue goes to the army and navy.

A MORNING WITH MRS. E. CONOMY

8 a.m. She makes up the children's lunches. "I wrap the sandwiches in Par-Sell Heavy Waxed Paper," she says, "because I know that Par-Sell will keep them fresh. In fact, I use Par-Sell from the mere time a dozen times each day—for long cake pans, keeping coffee, and protecting food freshness and flavor."

9 a.m. She starts her duties—but she no longer uses lather, duster cloths. She uses Windex Paper, which does dusting, cleaning and polishing all in one simple operation. Windex Paper is among her most recent discoveries. "I save so much time," she says, "and keep my furniture brilliant all the time."

10 a.m. Mrs. E. Conomy, while at her kitchen table, needs a sheet of waxed tissue to cover an exposed joint. Presto-Pack, a clever sheet of waxed tissue that hangs on the wall and yields one sheet at a time, delivers the sheet handily to her and she holds it on with an elastic band. Presto-Pack tissue has a hundred uses.

11 a.m. She prepares carrots and onions for dinner. But she doesn't use two pots. She wraps each vegetable in Canapar Cookery Parchment, puts both in the one pot, and puts them on a low heat. Canapar keeps each vegetable nicely delicious in its own juices and eliminates all odor. "I line roasting pans with Canapar," she says, "and I don't burn—and I don't have to scour the pan. Looking in Canapar also makes fish much more delicious and no odor escapes."

12 a.m. Her shelves need re-covering. She does that job with Handi-Roll, a \$5-roll of paper. "Handi-Roll," she says, "is easy to handle. I use it to line drawers, cover shelves, wrap parcels and dozens of other jobs that call for long sheets of paper."

Autogyro Wrecked

Machine Of Byrd Antarctic Expedition Is Damaged

The autogyro of the Byrd Antarctic expedition crashed recently shortly after taking off on an aerological flight, but without serious injury to the pilot, William McCormick.

The machine was wrecked. McCormick escaped with a broken left arm, minor bruises and a severe shaking up. After treatment he was resting comfortably.

The fleet of Columbus was worth only \$3,000.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawver told Gerard Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go on what was happening for himself—not as Gerard Keene, half owner of the Broken Spur ranch, but as Duro Stone, landlord in a Montgomery Ward willow suit.

Dad Kane, desert rat and luckless prospector till now, is retreating to tell Dustin and Spike Godhard, owners of the Broken Spur ranch, who had grumbled him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

(Now Go On With The Story)

CHAPTER II.—Continued

For a moment silence held both men. They knew the old foolish legend of the Mother Lode and they knew, too, that old desert rats like old Kane, believed in it with a vigorous protest of their disbelief; that foolish old tale that says that all gold is fermented and thrown out from a central body as the human heart sends blood to the distant parts of the body and that the tiny veins of gold, if found and traced back to their origin, will lead to the great Mother Lode where gold is made.

"Mother Lode hell," quoth Dustin hotly. "Where'd you find this? Is it for you here?"

"Four days' travel even with them trained asses of mine. Ever read yore Bible, Dustin? It's a sure worth readin'. There's a lot of good readin' in the Bible. It tells about a feller named Saul. He was a peach, too. He was a kind of a prospector same as me. He's buried got loose same as mine does. He went to trail 'em and he found a kingdom. I done the same. Mine got loose an' I followed 'em up Red Water canon. . . . Look here. . . ."

He waved futilely in his pocket, withdrew his hand and swore wildly. Then he slapped every pocket.

"I've done lost it," he said hoarsely. "I put down all the directions in my notebook of course. It don't make no red difference. I can trail back there at night if I have to but I don't like losin' a notebook that tells about it all. I know I had it just before I seen Gray an' Corse with the wagon."

"Maybe they found it," suggested Dustin.

"I won't help 'em none if they did. I reckon. But I'd sure like to have it back. It's got all my accounts with you gentlemen in it. It was up Red Water canon like I said. . . ."

"That's on Hour-glass land," said Dustin fiercely.

"Who knows it if I don't? That was when I seen the wagon. I was comin' back from huntin' my stray burros when I stumbled on a piece o' good lookin' folk. I put it in my pocket and went back to trace the coin. I found the coin on the hill-side and beated it and came back. I was aimin' to build me a fire and roast the ore to see what it was like. I had made all the entries in my notebook like I always do. Then as I come over the ridge I seen the smoke and the wagon and then I seen the Broken Spur men at work on the Hour-glass cattle. They left and I made my camp in the bottom. Then I went back and looked into the matter of the coin. I got out two little sacks of ore. I'll assay two thousand to the ton or I'm a Mormon. . . ."

"Huh! You've been spendin' a lot of time locatin' a gold mine for old man Carr on the Hour-glass land," said Dustin sneeringly. "A minute ago you were accusin' us of stealin' the Hour-glass cattle. Now you're locatin' a gold mine on the same land and . . ."

"Minerals is different," said Kane hotly. "You know that. Even a cow-puncher knows that. This is a mine! Any man in the West knows mine! Law. The man who finds a vein of ore kin follow it even under paternal land. The only thing is the other man mustn't find it first. I've only got to prove that I was the first to find it."

Dustin nodded and Spike too. They knew that anomaly of law that is not justice at all times.

"All the same," said Dustin, "it makes a difference. If Gray and Corse steal a few cattle, that's one thing. If you aim to steal a whole hillside full o' gold that's different. That's finance."

Kane swore gustily.

"Hour-glass or no Hour-glass," he said hotly. "I found the vein. I mean to follow that lead if it takes me plumb in to hell and I have to pen sulphur water hot from hell-fire."

"Old man Carr may be willin' to sell the mineral rights," said Godhard sardonically.

"Don't be a fool. . . . Dustin's face was grave. "The minute you ask Carr about selling mineral rights, you as good as tell him what he's got. He wouldn't sell us a cup o' water to keep us from dyin' of thirst. Of course there's a way to get 'em. In fact, I can think of two ways right now. We've got to get those mineral rights and get 'em quick. . . . before the Hour-glass finds out about 'em."

"Joe Carr don't even suspect any ore on his land. . . ."

"So much the better," quoth Dustin curtly. "You go on into the kitchen and get your supper, Dad," he said heartily. "We'll talk it over later. . . ."

He held his partner by the sleeve till old Kane disappeared into the kitchen. "Come on into the office," Spike he said curtly. "I want to talk this over with you before old Dad gets back."

Spike nodded, shouted to the cook to bring some coffee to them in the room and followed Dustin into the room and closed the door.

You will save money by smoking Dixie Plug, because it lasts longer in your pipe. You can cut each pipeful in your own way, coarse or flaky—long or short, as you prefer.

DIXIE

PLUG SMOKING TOBACCO

buyin' the rights from him would make him post the ranch against trespassers. Where'd we get 'em? I'm not worryin' much about old Carr. I got him as good as sewed up in a sack with head and feet stickin' out. It's bigger than Carr, I'm aimin' at."

"Huh. You talk like a fool," said Spike sharply. "How kin you say you got old Carr sewed up in a sack when you dassent even the yore pony to his tie-rack when you want to see that red-headed girl of his? You got the owner of the Hour-glass dead to rights? Huh. You make out to ride down to Secy to get the mail when there ain't no mail just 'cause you want to get another look at that red-headed Edith Carr. You make me tired."

For just one brief moment Spike Godhard stood on the bare edge of red tragedy. He saw in his partner's eyes such a glare of utter hate that he fairly shrank back at what he saw. For a full half minute Dustin stared at him fiercely; then he laughed. Spike drew a breath of relief.

"No use lookin' at me like you want to kill me," he said awkwardly. "I'm only tellin' you what all the Valley knows."

"About what, you damned fool?" snapped Dustin. "Of course old Joe Carr and I did have a row some three years ago. That was when your damned clumsiness got you caught nosin' up with his cows. If I want to tie my horse to the Hour-glass tie-rack, I'll ask no man's permission. Get that? Put that in your pipe and smoke it."

"You will like hell," snorted Spike. "You'd be as welcome there as a rat in a prairie dog's hole."

That was just the one remark needed. Dustin exploded.

"And any time I happen to want

Edith Carr, she'll come to heel and mind what I say and don't you forget it."

"I hear you. . . ."

(To Be Continued)

Announcing New Discovery

Daughter Of Late Madame Curie Has Formula For Synthetic Radium

A formula for synthetic radium will be officially announced by Mme. Irene Curie-Joliot, daughter of Mme. Pierre Curie, at the scientific conference at Cambridge, England, it was reported in Paris.

Mme. Curie-Joliot and her husband, Dr. Frederic Joliot, have been carrying out experiments in close secrecy for a number of months, it was added. Recently they were said to have been engaged in perfecting their discovery following early successes last July.

The "Petit Journal" said that Mme. Curie-Joliot is being considered for the Nobel prize, which her late mother won twice.

Support Your Newspaper

In order to be of the greatest value to its community a newspaper must be prosperous; it must earn by legitimate support from subscribers, advertisers and the users of printed matter a sufficient amount to be able to put out a paper worth while. The better support your home paper has, the more able it is to serve the community.

Faster Way Found to Relieve Headaches

NOW PAIN OFTEN RELIEVED IN MINUTES!

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

Millions have found that Aspirin cures even a bad headache, neuritis or rheumatic pain often in a few minutes!

Put in the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moist food or liquid, "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show that Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get a tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH An Aspirin tablet starts to disintegrate and go to work.

What happens in these stages: Aspirin in water starts to disintegrate and go to work. It picks up a few minutes after taking.

When in Pain Remember These Pictures

— ASPIRIN DOES NOT HARM THE HEART —

Pre-Dedication Exercises.

On Tuesday evening the basement of the new Evangelical Church was crowded to capacity when a religious picture, "The Stream of Life," produced by the Church Film Corporation, was presented by Reverend C. E. Rogers of Carstairs.

On Wednesday evening a prayer service was held which was conducted by Reverend W. W. Krueger, missionary superintendent. He presented his report from the general conference at Akron, Ohio. The service was followed by the second quarterly conference of the circuit.

This evening (Thursday) a program of music and song will be given under the auspices of the Albright Brotherhood.

On Friday evening the ladies will give a Fellowship Supper, with addresses by Reverend C. S. Pink, pastor of the church, and Reverend F. E. Hawley, pastor of the church at Carstairs.

Saturday evening a youth rally under the chairmanship of Goldwin Gabel will be addressed by Bishop Praetorius.

Better Get Your Radio License!

Mr. Standen, radio inspector of Didsbury, was in town on Wednesday checking up on radio licenses. He tells us that several summonses will be issued.

Rugby W.I. Celebrates Twenty-first Birthday

Rugby School was the scene of a most successful birthday party on Friday evening, November 2. The W.I. was celebrating its 21st birthday. About eighty guests sat down to a bounteous repast. In a few well chosen words the president, Mrs. Evans, welcomed the guests, who were honored by the presence of Mrs. Ferguson of Trochu, provincial president, who motored over specially for the occasion.

Toast given were: "The King," by Mrs. Evans, followed by the National Anthem; "Our Organization," by Mr. John Clarke, response by Mrs. Ferguson. At this point a birthday song was sung. The toast "To Our Province," given by Mrs. John Clarke, was replied to by Mr. A. G. Smith, followed by the singing of "Alberta." Given by Mrs. Barrett, the toast "To Our Men" was responded to by Mr. W. F. Brown, after which was sung: "For He's a Jolly Good Fellow." A toast to "Our Municipality" by Mrs. Hoeggen was replied to by Mr. Alce Hagg. Entertainment comprised a vocal duet from Miss Jackson and Miss Iris Farrant, a humorous recitation by Miss Ray, and anyone requiring mustard plasters should apply to her, and vocal solos were rendered by Madame Mandana and Hagg, also an instrumental number by Lester Krebs.

A beautifully decorated birthday cake, made by Mrs. H. Jackson, graced the table, and after the cake had been cut and distributed Albert and Entrance Krebs sang "The Institute Birthday Cake," a truly wonderful one according to them. Mrs. Ferguson's address was most interesting and her account of the W.I.'s very successful year. The gathering was glad to hear from Mrs. Arthur of Hartmann, a former Rugby member. At the close of the evening "Auld Lang Syne" was sung, followed by "God Save The King." Goodnight songs were said and everyone wound their various ways home tired but feeling that a most worthwhile evening had been spent by all.

The December meeting is called to take place at Mrs. August Krebs' and members please remember that this is the last meeting of the year and all are urged to attend, also that a sale of work, which drive and dance will be held in the Melvin school on Friday, November 30.

—Contributed

Auction Sale will be held at John E. Clarke's farm, 9 miles West of Didsbury, on Wednesday, November 29th, when Archie Hooper, as auctioneer. Watch for sale bills.
